Daniel Harvey Hill

يو يو

P ROFESSOR Daniel Harvey Hill, A. M., occupies the Chair of English in the faculty of our college, having been elected to this position at the foundation of the college in 1889. Professor Hill is a universal favorite in the college, having endeared himself to the students not only by fine scholarship and teaching power but also by manly, attractive, gentle and sympathetic personality. He is every inch a man, and combines in high degree the splendid qualities of his distinguished ancestors.

His father was General D. H. Hill, a graduate of West Point, an officer in the Mexican War, twice promoted for gallantry, Colonel of the 1st, N. C. Regiment, Confederate Army, rising by successive promotions for gallantry and efficiency to the high rank of Lieutenant General. He was also Professor of Mathematics at Washington and Lee College and later at Davidson College, Superintendent of the North Carolina Military Institute at Charlotte, and at the time of his death, President of the University of Arkansas. General Hill was a man of letters, author of several books, founder and editor of "The Land We Love," one of the few successful magazines ever conducted in the South. The Hills have for many generations been brave soldiers and finished scholars. Solomon Hill, a North Carolina planter, served in the War of 1812. Colonel William Hill, during the Revolution, was second in command of Sumpter's Legion. They were ancestors of Professor Hill. It is a very old family; refined, cultured, brave and faithful to duty.

Professor Hill's maternal relatives are even more distinguished than the paternal. His mother was Isabella Morrison, daughter of Rev. Dr. R. H. Morrison, founder and first President of Davidson College. Dr. Morrison's three oldest sons were officers in the Confederate Army, and nearly all his daughters married officers. The eldest married General D. H. Hill: the third, General Stonewall Jackson; the fourth, General Rufus Barringer; the fifth, Major A. C. Avery; the youngest, Col. J. E. Brown. Professor Hill's grandmother was Mary Graham. daughter of General Joseph Granam, of the Revolution, and sister of Hon. William A. Graham, Governor of North Carolina, United States Senator and Secretary of the Navy under Jas. K. Polk. During Graham's administration of the Navy and by means of his wise and farsighted statesmanship the leading seaports of Japan were opened to the commerce of the world, and thus a beginning was made of Japanese regeneration and civilization, probably the

most remarkable and far-reaching event in Asiatic history within the past two centuries.

Professor D. H. Hill was born at Davidson College, N. C., January 15th, 1859; was educated at the Carolina Military Institute, Horner and Graves' School and Davidson College, graduating in 1880, as Bachelor of Arts. In 1886 he received the degree of Master of Arts, and in 1905 that of Doctor of Letters. The year of his graduation he was elected Professor of English in the Georgia Military and Agricultural College, holding this position until he was elected to his present Chair in the North Carolina College of Agriculture and Mechanic Arts. In 1905 he was chosen Vice President of this college.

Professor Hill is a member of the Southern Historical Society; Registrar of the Sons of the Revolution; Chairman of the Executive Committee of the North Carolina State Historical Society; Bibliographer of that Society since its organization; member of the State Historical Commission and of the Sons of Confederate Veterans; ex-member of the Executive Committee of the Southern Educational Association.

He is the author of "North Carolina Troops in the Confederate Army," being one of twelve volumes of "Confederate Military History," and a joint author with Drs. Burkett and Stevens of "Agriculture for Beginners," besides being the author of many historical and magazine articles.

Professor Hill is married to Miss Pauline White, daughter of Dr. S. G. White, Surgeon United States Navy, formerly in the Confederate Army. They are blessed with a beautiful home life, having five bright, healthy and attractive children.

Editorial

يلى يلو

Since starting our work on the 1906 AGROMECK we have suffered a great loss in the death of our fellow editor and class-mate. James Edwin Moore. "Jim Ed.," as he was familiarly called by his class-mates, was a faithful and capable editor. To see him was to admire him; to know him, to love him.

We present this, the fourth volume of the Agromeck, with best wisnes and beg that you bear with us in our mistakes and shortcomings. The students can appreciate some of our difficulties and it is not our desire to publish our troubles to the rest of the world.

It has been our chief endeavor to present to you in this volume every phase of college life, and in later years we trust it may give you some pleasure by recalling to you your college days.

In conclusion we desire to express our gratitude to Messrs, Lynch, Valaer, Kenley and others who have given, so freely, their talent for the book.

"To '06"

Comrades all, come let us linger for a moment ere we go, When again we meet together, none can tell and none can know.

Four long years we have worked together, each for each and all for all Wakened by the same old whistle, by the same sweet bugle call.

Studied with the same Professors, drilled together side by side, Felt discouragement together, or the glow of college pride.

Oft together for some pleasure e'en a stolen one perhaps, Or for all, the day has ended with the gentle sound of Taps.

Though discussions may have severed, though opinions may offend, Yet we've been four years together, working for a common end.

This itself is binding, mutual, this itself shall be the bond. That shall hold us yet together in the busy life beyond.

Senior History

In the fall of 1902 all eyes were searching the educational heavens for a new star. Gradually above the horizon it rose—bright, sparkling and resplendent in all its glory. Another luminary had begun its course, and the class of "Naughty Six" was launched forth on the sea of knowledge with all colors flying, and so, gentle reader, what follows is the history of this remarkable class, a body of young men on whose escutcheon there is no stain and in whose wake there follow no signs of defeat. It would be impossible to tell all that has occurred in the life of the class; hence it will be the aim of this history to acquaint the reader with only the most important facts.

While Freshmen, as was the custom, we underwent all the physical inconveniences imposed on us by the Sophomores (May Allah bless them!) without one murmur of protest. We submitted to applications of face lotions, composed of shoe polish and iodine, with the utmost stoicism, knowing well that silence was golden. Time and time again we were made the helpless victims of their pleasure, but had it not been for their untiring efforts to make us feel at home and add the spice to our Freshmen year, it would have been dull indeed. May their tribe increase b

Our Sophomore year began, as we thought, in a blaze of glory, when on our return to college we were hailed as "old men" by upper classmen, and inwardly consigned to the asbestos-lined chambers below, by the luckless Freshmen, as they kept step to our rythenical whistle or "tripped the light fantastic toe" on a table at midnight. But alas! The beginning came only when we sruggled with the terrors of the class-room in the shape of "Trig," Geometry and other kindred studies. Faint hearts were many, but the spirit of the Class manifested itself in the individual, and in the end we were victorious, as only a body of determined young men can be. When our Sophomore year was over, we realized that as "wise fools" we had passed, as it were, the trial by fire of our college course, and felt fully able to cope with the problems of the coming year.

Our Junior year was perhaps the hardest of any. The dreams of a rarebit field were never more fearful, or a nightmare with all her nine-fold more dreadful than our fitful midnight contemplations of approaching "exams" on Mechanics or Analytics. But we managed to stumble through them all, picking up a formula here and there and a problem occasionally; and then came Calculus to the incessant tune of "Now gentlemen."

Aside from class-room work we have been successful in athletics. The Faculty offered a magnificent cup to the champions in class foot ball, and of course we won it. Yes, we won it, but not without some of the hardest playing that ever fell to the lot of a class team. It was won by some of the finest team

work that has ever been seen outside of the "Varsity." The cup is a silver one, beautifully engraved, and it has been placed in the Library where all may see and learn of the prowess of the Class of 'o6.

As a finishing touch to the victory, and as a vent to our exuberant class spirit, we gave a reception in the Library, following a meeting of the student body in the Auditorium, the meeting Leing addressed by President Winston, Professor Wilson and others on athletics, and class athletics in particular. After the addresses dainty refreshments were served in the Library. Words can not express nor pen describe the scene of beauty and gayety that followed. Visions of loveliness from the grim walls of B. W. W., St. Mary's and Peace vied with one another in making the occasion a dazzling success. Their nymph-like beauty, casting, as it were, an enchantment of intoxicating pleasure over the scene, caused many a cadet to swear by all the gods that for beauty, radiant womanliness and sweetness of character, the Southern woman stands supreme. Those hours of enjoyment will never be forgotten, and as the last straggler left the hall, silence mocked the dying echoes of mirth and laughter.

Not only in class athletics have we been prominent. We need only to name Perkins, Wilson, Gregory, Lykes and Knox. They never failed to respond with all toeir might when the call came.

Our Senior year began under a new commandant and under new rules in regard to liberty; so for a time we were rather unsettled. (The Senior privates in particular.) This period of unstable equilibrium lasted for only a short time, as we speedily recognized the ability of the new commandant and the leniency of the restrictions surrounding us.

On October the twelfth, as a token of his good will toward us, and in celebration of his fifty-third birthday. Dr. Winston gave us a reception at Giersch's Cafe. The occasion as a whole was a most delightful one and did much toward cementing the already close ties of friendship existing between the Class and the Governing Power.

Christmas has come and gone in joy and happiness, but the new year brought sorrow, for "Jim Ed." has answered to the last roll call. James Edwin Moore, was our class-mate and our friend. In his death our college has suffered a great loss and the State has lost a promising son.

Only a few brief months, a step, and we pass out from our Alma Muter, to battle for ourselves and for the right. The future is before us, and it will be what we make it. But let us not forget the foster mother. Under aer sheltering care we have grown from boyhood to manhood, unfolding as green buds in the bright sunshine of North Carolina's bounty and wisdom. All hail to A. and M. and the old North State forever.

Class Prophecy

JE 35

It was in the month of January, in the year 1920, that I sat one night in my laboratory alone. The radium heaters were turned down low, making the room very comfortable in spite of the chilly breezes outside, while the opalescent shaded globes of liquid sunshine diffused over the room a glow of genial brightness.

As I meditated, my thoughts were of my college days and my class mates. How eager we were then to meet the world face to face, and how confident we were of our ultimate success. Have they all realized that success for which they hoped? I would like to know.

Before me, on the table, was my latest invention, the result of years of toil, It was the teleautograph, an emi-odiment of the latest ideas in regard to wireless telegraphy and automatic phonography. Would it work? That was the question Perhaps some passing magnetic disturbances of the ether would reach it, and then what might I not hear? I would wait. No sooner were the words out of my mouth than, with a whir, the machine started and I was surprised to bear the voice of Abernethy. He was saving, "Hello, old fellow. I am at Raleigh attending a reumon of our Class, and learning that you had not been notified to that effect, the Class has decided that each in turn will call you up and in a few brief words give you an account of his life from May 30, 1906, up to the present year. As I head the list, here goes for me. Soon after graduation, I accepted a position as surveyor with the Banololo Railway Company in the northern part of Luzon, which position I held for some time. But the rambling spirit came on and I traveled until my money was gone. At present, I am considering an offer from the same company, of a better paving position. If I accept, a little brown girl waits for me."

I gazed fixedly at the machine. How in thunderation did they make connection with it, and he said, "call you up." In two minutes I understood. My wires had crossed with the 'phone wires and now instead of it working "wireless" it was minus that feature.

"Hello! Hello!" came from the brazen mouth of the machine, and I recognized Allen. "What's the matter with you? With the helpful sympathy of the president's daughter (cotton mill of course) I have at last succeeded in becoming a partner in the Olympic Cotton Mill. Of course this is confidential. From boss weaver up to the position I now hold, has been one steady climb and I attribute my success to the thorough training I received under 'Prince Henry' and 'Ooks.'"

ASBURY:—"I soon became tired of tramping through swamps to measure a few acres of land, and offered my services as choirmaster to the Mt. Zion Church, where on Sundays you can hear my voice ever mounting upwards in accents sweet and clear."

BAKER:—"My first job was to survey a tract of land belonging to Colonel Starbottle, of Wakefield. I succeeded in getting on the good side of the Colonel and on the better side of his daughter, and now am seriously contemplating the advisability of entering into matrimony. Should I do so, will let you know."

Я: ж ж:

BEAVERS:—"Naturally, my first job was boss milker in a dairy. From that lumble position to the position of president of the Oleutter Cheese Mfg. Co., was quite a step, but it was due largely to my perseverance and personal qualities. My knowledge of all things lacteal, is varied. I forgot to add that with each cheese is given a patent anchoring device to hold it to the table."

* * *

Bell:—"As assistant chemist of the Kinston Oil Refinery, I had a chance to show to the world that given a chemical education and an opportunity, even the 'biggest and the littlest' can make a name. Send for samples of my Greasoline, the only substitute for lard. I can refer you to the A. and M. Mess Hall Syndicate, N. C. Penitentiary, and Wake County convict camps."

* * *

BLACK:—"Don't ever say 'civil engineering' to me. What can compare with the life worth living—the life of a free and independent farmer. I can prove to you any time, that the law of diminishing returns from land is false. Besides being deacon in our church. I am 'Papa' to two of the finest little chaps in the country. They are twins, and the way they render 'Taps' is enough to bring back memories of long ago."

* * *

BROCK:—"At last I have found my place. As a stump speaker I have achieved remarkable success. Some have gone so far, however, as to call me a demagogue, while others hint that were I to wrap a few wisps of straw about me, I would be a demijohn; but I assure you that my name will ever be held in reverence as an advocator of the downtrodden and suffering public."

Buys:—"I always had a desire to travel with a side show ever since my first glance in the Midway at the State Fair, and now I am engaged in telling the public of the wonderful exhibitions given by La Belle Vira. Right this way! Right this way! Positively the last performance given to-day by the 'Little Lady!' Come one; come all! Only ten cents; a dime; one tenth of a dollar! Boys, you'll never regret it!"

Chesbro:—"I have just patented my machine for separating the cream, and making the butter at the same time. It is a wonderful machine and I have no doubts but that it will prove a good seller. I will send you a photograph of it in a few days. I have an idea that I might die some day and in consequence I have made my will. In it I leave my lieutenant's bars to my oldest son."

CLARDY:—"Soon after my graduation I left for Richmond to enter the works of the Eureka Electric Company, but they failed to recognize my ability, and after a heated discussion with the manager, I resigned, and an now the only certified male nurse in existence. From what I have learned of nurses and nursing. I am confident that when there is a 'C'' Jr., he will be well cared for."

CLARK, D. M.:—"Ask any South Sea Islander and in glowing terms he will give you his opinion of me. With my hair, which is only rivalled by the hirsute efflorescence of 'The Girl From Up There,' I have won fame as a medicine man."

Clark, J. W.:—"My ardent love for all things military caused me to resign from the position of business manager of the Jonesboro Weekly, and enter the regular army. I am, at the present stationed at Fort Nit, where I have endeared myself to all, from the cook to the Colonel. Did you ever pay up your subscription to the Red and White?"

CLARK, J. D.:—"From the 'land of flowers,' I bring you greetings. Our friends, the alligators, are becoming so scarce that I have organized a company for their preservation. But this is a means to an end, for on their coming into age, they donate their hides to us, to be made into serviceable articles. Strange to say they never make any kick about it at all."

CLARK, S. H.:—"It is an established fact that I carry the finest line of gent's furnishings in the State. I under-sell and out-buy my competitors and am thus able to divide the profits with you. When business cares become pressing, and visions of goods, marked down from one dollar to ninety-eight cents, fly through my wearied brain then I 'hie me away' to the grass-coated diamond, or listen to the click of the ivory balls."

CLAY:—"I am not 'Professor' any more. When I am not engaged in managing the affairs of Dick, Clay & Co., I am dispensing sweet music to the little Clays. 'Once There Was a Burglar Bold' and 'Under the Old Apple Tree,' are still my favorites. Where's the 'Judge?'"

* *

Cox:—"I thought that I knew enough about chemistry to hold a job, but it seems that I did not, for after losing my job so often I opened the Cox Tensorial Parlors, where I can serve you to the accompaniment of chin music and odoriferous bay rum."

CROMARTIE:—"While in college, I proved to be somewhat of a puzzle to my class-mates, and when I get tired of pulling the bell cord of misfortune over a gray nulle's back, on my one-horse farm, I pose as 'The Human Puzzle' at the post-office. I get there just the same."

* * *

EDWARDS:—"My first job was to build a dam across old man Bill's creek. Well, I got it up all right and it held pretty well until the first freshet, when it 'busted and ruined a lot of the old man's corn. I quit the dam business then, and am now engaged in selling gold bricks to people with more money than sense. Do you want one?"

* * *

Egerton:—"I am now body-guard to the commander of the Equela standing army. When I am not engaged in the arduous duties of my office, I am serenading the dusky beauties of Equela. With my Adonis-like manners and my captivating voice, few are they that can resist me."

* * *

ELLIS:—"Above the roar of the wind-swept sea, and above the crash of the forest monarch, is ever heard the name of W. T. Ellis. My life has been one grand success. What I do not know I don't want to know, and if you ever need advice, call on the consulting engineer of the Titanic Turbine Co."

* * *

ESCOTT:—"As junior partner of the D. A. Tompkins Co., I have realized my dearest hopes. Both my business ability and my thorough knowledge of cotton mill machinery have been instrumental in my success. I have organized a Glee Club among the mill hands and our debut on the stage will be made some time soon. Should you care to hear us, a complimentary ticket is at your service."

ETHERODGE:—"I have tried a little of everything since my graduation. I first tried life as a jolly sailor lad, but after the first taste, I quit. I next accepted an offer from the Manteo Times, as sporting editor, thinking I knew enough about athletics to write up a game. My first write-up sealed my fate, and now I am doing what I ought to have been doing ten years ago—making scuppernong wine."

* *

EWART:—"The fertility of my cerebral coming-tower had made me a many sided man. From chef at the Waldorf-Astoria to 'cookie' in a mining camp. I have bumped the bumps of this naughty world. The visions I see in the middle distance, my signature and my desire for liquid food, are with me yet. I am still agent for the Great Western Oil Co., and would try to sell you a few shares, but 'yours shakily' must close."

k # %

FOSTER:—"To give my experiences since leaving college would fill a book as large as an agricultural bulletin. No doubt you have heard of my discovery of the rare beetle, 'Poe Americanus,' that brought me fame. At present, I am getting up a collection of masculine grasshoppers; the kind that dance attendance on the butter-flies of society."

* * *

Gregory:—"For two years after leaving college, I coached the Halifay High School football team, where my efforts met with success, for we never lost a game. At present I am undecided whether to coach A, and M, this year or succeed the assistant chemist of the Caraleigh Fertilizer Works."

* * *

HAMILTON:—"Soon after I graduated, I started a scientific journal called 'Grasso Scoprire,' which I edited for some years. From this work, I realized quite a handsome sum of money. I am now located in Higcidade, N. C., having retired from active work. It is needless to say that the girl is with me now, and, as she always did, takes great interest in my literary productions."

水 准 字

HANSELMAN:—"Well now, I'll tell you. They can't keep me down. By sheer strength of determination I have risen from apprentice to manager in the Martian Aerial Railway. Dod gast it! My name will yet shine as one of the foremost engineering experts on this mundane sphere. Ask Betty."

ata ale de

HEWLETT:—"From the time when I was disappointed in love, and seat her a Red and White when she was married, my life has been one continual disappointment. The Westinghouse people did not like me, and the feeling was reciprocated, and all on account of their not letting me use my judgment. And then my voice failed two years ago, and I am miserable. Farewell."

Hicos:—"From the smallest man in our class, I have grown so rapidly that I now weigh three hundred and fifty pounds and am with a dime museum. This kind of a life is a 'cinch,' and say, I am going to tell you a secret.—I am engaged to the fat woman. Don't mention it to any one, because she's a woman you know and there's no telling when her mind may change."

* * *

Hodges:—"I am now manager of the B. U. M. baseball team and you ought to see us play. We play the Mugwumps to-morrow at the Fair Grounds, and from the sale of tickets, there promises to be a big attendance. There is some talk of La Grange getting up a team. If so, I shall of course offer my services. If they are accented, watch me shine."

* * *

HUBAND:—"It's just this way. I have been in a hole for some time, but as soon as I patent my automatic filing cabinet for catalogs and bulletins, I will be able to meet all obligations. Then Winston-Salem and the girl of my choice, for me."

* * *

JORDAN:—"Soon after graduation, I accepted a position with the Rhamkatte Transportation Co., as assistant surveyor. I am now son-in-law of the president of said company, and I attribute my success in both love and business to my indomitable energy."

* * *

KNOX:—"At last my cherished hopes are realized and the irridescent dreams of my youth have materialized. I am now commander-in-chief of the Equela standing army, an army whose uniform is limited to X/X/X brand flour sacks, but in whose hearts there lies a love for their commander which passeth all understanding."

* *

LOVILL:—"An eminent divine once said, 'Brother Lovill is one of the shining lights of Christendom,' and I have tried to live up to this, in both word and action. My pamphlets on 'Missionary Work In Foreign Climes,' will be sent free on request."

* * *

1.5 KES:—"An All-American man I am, and have been for years. While I am not punting the pigskin, I am engaged in working on a compound for the reduction of big hands. In case I should fail to make it work exactly right, I shall lend my efforts to the inventing of a postoffice box that will automatically circt the letter when opened."

McLendon:—"Last year I raised two hundred and fifty bushels of corn to the acre on my farm. How's that for me? Between the cross-roads store and my farm I am kept pretty busy. Talk about the 'fittle Macks'. There's no race suicide where I live."

* *

MAXWELL:—"Ever since my departure from college I have been in the employ of the Colorado Irrigation Co. From rodman to manager I have served, and with success. In the Maxwell of to-day, you would fail to recognize the 'newsboy' of yesterday."

* * *

MOORE, L.:—"I am doing a rushing business in Graham now. The firm of 'Moore & Co.' never fail to deliver the goods. With my winning smile and my Apollo-like features I never fail to attract the ladies. Should you feel in need of anything in the line of drugs, come around. To bring back old times, I occasionally milk my neighbors' cows."

Morrison:—"As floor-walker for Cheatem & Co., I have achieved success. Shoplifters are so attracted by my graceful bearing and my military figure that they forget to ply their netarious trade. The additional attraction I afford to passers-by, makes me of much value to the company."

* * *

Myrick:—"My first job was with the General Electric Company, where for six months 1 daily disturbed the equilibrium of the saline solution in a water reheostat. I am now in charge of the Littleton power plant, where J have troubles of my own. Should you come around, just remember that I charged up Murray Hill, etc."

÷ * *

NIVEN, C.:—"The fertile soil of Anson County has certainly been good to me, and I have prospered in consequence. With few exceptions, I have never found any use for all those 'ologies' we studied in college. When I am not on the farm, the Morven Debating Society claims my attention.

* *

NIVEN, L.:—"Yes, this is 'Leander,' champion of woman's rights and lecturer on 'The Woman of Yesterday, To-day and To-morrow,' I have a happy home now, and I find that with a woman's love and plenty to eat, a man is as near the happy hunting ground as he needs want to be."

v v *

ODEN:—"Oden's Department Store and Crackaloo Parlor, under my skillful management, has prospered in the last few years. I find that my best line of dry goods is the Uneeda brand. When I am not listening to the merry clink of the pennies on the marble floor. I am arguing with the undecided purchaser."

OTHERN:—"You would not think that the world renowned pianist, Tchowsky, was an old friend under a new name. I was forced to change my name, as no one would come to listen to a musician with the simple name of Ogburn. You shouldn't fail to hear my inspiring march, 'The Right Mechanicals,' accompanied by a steam hammer and a trained gang of boiler makers."

* * *

PARKER:—"My success has been phenomenal. Since my graduation, I have worked for the Aurelia Chemical Works. I am now assistant chemist, and i, is only a question of time until I am offered the position of head chemist. My article on 'The Analysis of a Chemical Lie,' is widely read."

14 18

PERKINS:—"For several years, I have been engaged in extensive research work. My investigations have been along the line of other chemists, i. e., to get something out of seemingly nothing. There is a position open for me with the Nebula Mining Co., and it is very probable that I shall accept the offer. Then Europe for me."

Piver, A:—"Under the parental guidance of Professor Riddick, while at college, I learned much that has been invaluable to me since then. My improved transit has brought me fame, and my works on the 'Construction of the Martian Canals' are read with interest."

PIVER, W.:—"Bud has had a better time of it than I. I am still on the lower half of the ladder of success, and with poor prospects of anything better. Only once did the lime-light of publicity fall upon me, and then only for a short time. That was when my book, "The Analysis of a Kiss," was published."

* * *

ROPERTSON:—"Should you ever be in the cotton mill district of Massachusetts, don't fail to visit my one hundred thousand spindle mill. Somebody prophesied that I would settle in North Carolina and the succeeding generation would sing, 'Everybody Works But Pa,' but my bank account tells a different tale. Am thinking seriously of putting out a magazine for the advancement of the textile industry."

TM.TON:—"I can give you pointers on the best method of increasing ones height, so as at the same time to preserve the latitudinal dimensions. I have applied my method of treatment to myself, and I now find that with ease I can empty a pail of milk into a separator without spilling one drop. Write for the free lessons,"

TILLMAN:—"The Tillman Electric Mfg. Co. has brought me fame and wealth. My shipments of electrical aparatus from burglar alarms to complete power plants are increasing daily. My electrical novelties are so well distributed over the world that the cannibal kings of darkest Africa cure indigestion with my electro-medico battery."

TOMLINSON:—"As president of the Goldsboro Female College, I am contented. Never were a Mohammedan's dreams of the houris of paradise more beautiful than the visions of loveliness that daily confront me in the lecture room. But I am single yet. I never could get a girl to believe that I meant what I said. Look for my book, "The Disadvantages of Flirting," and be sure to read it."

Tull:—"As Vice-President of the 'Society for the Prevention of Work,' I have been successful. Last year the Reid Tull Home, for those who are naturally indolent, was established and in two days we had the house full. But if you care to join with us, I can get you a room. I am too tired to talk any longer."

Tuttle:—"Confidentially, of course, I am going to let you on to the secrets of my business when I see you. I am putting out the finest brand of 'mountain dew' that ever was made, not excepting Casper's 15-year-old. Tuttle's 'Nectar of the Gods' is a drink fit for a king. It is mellow, well aged and positively non-taxable. Come around. The latch-string will be out and the gourd full."

Uzzell.:—"Write at once for my memory lessons and make a new man out of yourself. My habits of hard study and my literary qualities have won for me a place on the pedestal of fame. I am to be married soon; i. e., if I can get there on time."

VALMER:—"I have been the champion athlete of the world for three years. Although I am married, the girls go wild over me when I break my own records. But I intend to quit this strenuous life some time soon and follow the simple life in a soda-water factory in the dear old town of Winston-Salem."

VAUGHAN:—"As chief engineer of the Utopia Mfg. Co., I have achieved success. I have been trying for some time to get 'Dutchy' to assist me, but he is so wrapped up in his aerial railway that he won't listen to an offer. But I hope some day to reconcile myself to his absence."

WILLIAMS:—"After trying unsuccessfully for several years to run one Draper print-cloth loom, I gave up the textile business and am now engaged in Y. M. C. A. work. I am so deeply interested in the work that I never have any time to write to the girls, and have long ago given up my plans of going to Texas."

* *

W:nston:—"Why certainly, this is Lewis. I tried 'cow-punching' and 'bugology' and all that sort of business and finally gave it all up as a bad job. Do you know that one half the fellows that take a college course don't know what they are doing. They think that just so they 'skin' through on 'exams,' they can put up a big bluff and draw a big salary on the strength of it. Take me, for example. I studied hard for four years and now I am in a postoffice working to the merry tune of the cancelling stamp, and am contented. As I am the last of this gang, with my 'spiel' ends the tale of the Class of 'co."

:k :k :k

The machine stopped; the hours passed; but still I sat and mused. I went back along the dim paths of memory fourteen years, and lived my college life again.

Alumni

CHARLES W. GOLD, B. S.

Chas. W. Gold, familiarly known while at college as "Bap," was born April 16, 1874. He prepared for college at the public schools of Wilson, North Carolina, and was graduated in Agriculture from the Agricultural and Mechanical College with the class of 1805.

While in college he was President of the Agricultural Society and took a great interest in that society, also in literary society work, representing the Pullen Literary Society in an intercollegiate debate at Morehead City.

After leaving school he began farming and dairving which he followed for some

time, but afterwards took up newspaper work, editing the Wilson Times and Dixie Dairyman. In 1898 he was Secretary and Treasurer of the State Dairymen's Association. Later he engaged in the life insurance business and became Vice-President of the firm of Gold and Gold, Incorporated, of Greensboro, N. C., general agents for North and South Carolina for the Provident Savings Life Insurance Company of New York. This company has had a General Agency in North Carolina for twenty-two years, Gold and Gold having bought the agency from J. Sterling Jones. Being with an insurance company that has been tried so long in North Carolina and found to be strong and reliable, the general agency of Gold & Gold is one of the largest and most progressive in the State; and its territory has become one of the Provident's best fields.

Mr. Gold has served on the Board of Aldermen of his home town. He is now on the Board of Visitors of the North Carolina A. and M. College and takes much interest in the college and boys and is always looking after the best interests of both.

In 1897 he was married to Miss Ella Howard, of Conetoe, Edgecombe County, North Carolina, and to this union have been born three children, two girls and one boy, "Bap" Jr.

G. Z. Rogers was born in Person County in June, 1872. He entered the Sophomore Class at the A. and M. College in '91, graduating with second honors in the Class of '94, and was one of the commencement orators.

After leaving college he began work with a masonry construction company and later took charge of the construction of a street electric railway in Baltimore, M.I. This work being completed he entered the U. S. Engineering Corps in charge of the torpedo defense of Baltimore during the Spanish War. At the close of the war he entered the employ of the Baltimore and Ohio Railroad as

topographer in an engineering corps, surveying preliminary lines in West Virginia and Ohio, but was soon transfered to Fairmont, W. Va., as Resident Engineer in charge of the construction of new yards and freight and passenger stations. Then he was appointed Resident Engineer of the construction of a short branch of the B. & O. R. R. On the completion of this work he was again transfered to Fairmont to build a large round house, freight yards, machine shops and other necessary buildings.

While in this part of West Virginia he had charge of making extensive surveys for double track along main line single track and surveys of the old substructures for the erection of new steel work in the B. & O. R. R. bridges across the Ohio at Parkersburg and Wheeling.

In Jan., 1904, he was appointed chief masonry inspector on the Washington Terminal Improvements for the B. &. O. R. R. In May, 1905, he accepted the position of general inspector of the construction of the Union Station at Washington, D. C., which will cost about 4,000,000 dollars.

Je Je

DAVID COX, B. E.

David Cox graduated from the branch of Civil Engineering of the Agricultural and Mechanical College with the class of 1894. He began Civil Engineering and Land Surveying in February, 1895, on his twenty-first birthday and made a success from the start. He has been County Surveyor three terms, and was Chief Engineer of the Elizabeth City and Western Railroad, and has worked for some of the largest railroads in the country. He is at present engaged in Civil Engineering and Land Surveying at Hertford, North Carolina, and is preparing his two-year-old son for the A. and M. College, where he hopes to make an Engineer of him.

WILLIAM D. FAUCETTE, B. E.

Wm D. Faucette graduated from the Civil Engineering Department of the college in 1901. In his Senior year he was Senior Captain of the Battalion. After leaving college he was for a short time with the State Engineer, but soon accepted a position with the S. A. L. Ry. in Savannah, Ga., as inspector of dredging wharf and river work. Was then Resident Engineer of a short line at Quincy, Fla., and subsequently Assitant Engineer to the Savannah engineering office. At one time he was a successful candidate for Instructor in Civil Engineering at Michigan College, but withdrew. In 1903, upon recommendation of Prof. Cain, of the University, Col. J. L. Ludlow, of Winston, and Mr. Moneure, of Raleigh, he was elected Junior of the American Society of Civil Engineers. Mr. Faucette is now Assistant Engineer of the Seaboard system, in charge of the Southern divisions with office at Savannah. Not less than five of the college graduates have been with him during the past three years.

WILLIAM FRANKLIN KIRKPATRICK, K. A.: B. E.: B. AGK

W. F. Kirkpatrick, entered the North Carolina A. and M. College in the fall of 1901. While in school he was, at one time, President of the Leazar Literary Society, which he twice represented in public. He was a member of the Thalerian German Club, Class Historiographer and editor of the Agromeck.

He is now in the Bureau of Animal Industry and is assistant expert in Animal Husbandry for the Agricultura! Experiment Station at Kingston Rhode Island.

Junior History

عي عي

When a man not so very big is assigned a subject so very big as the Junior Class, he naturally feels his inability to measure up to the requirements of the hour. Nevertheless, since this honor has fallen on me, I shall endeavor to do as much with it as can be done with a subject of such magnitude.

Nearly three years ago we came to college slightly affected with verdancy, right much given to asking questions, questions that we often had to answer for ourselves, and a bit awkward with our tongues, but nevertheless as capital a set of fellows as ever breaks into a college.

We were disappointed in several things: First, we did not create as big a sensation as we had expected; second, examinations proved that we did not scintillate as brightly in the mental heavens as we had expected; third, our appetites went on an unexpected strike, a green, pale, somewhat home-sickly sort of strike, for a few days. But in one thing we were not disappointed. We had formed large visions of courteous and delicate and downright black and white attention from the Sophs. In this respect our expectations blossomed like a field just planted in peas, and in the delicacy and persistence of these considerate calls there was no rotation of crops. These midnight callers cultivated the same crop all the time, and were in so much danger of exhausting the soil that at last we had to stop them as short as a newly-fledged captain's answers.

We soon knew, loved and stuck to one another as tightly as burs. Our Class unity has been remarkable. No less marked has been our Class spirit. We were organized within a week after our entrance into college, organized indeed before our verdancy had rolled away and even before we knew it was there.

Our fellows took to various forms of athletics. Some found relaxation in carefully guarded and solitude-seeking tramps to town. Somehow they never encouraged the Senior officers to join them in these tramps. Some others, like E. Thompson Seton, were partial to moonlight walks and to listening to the smotherd music of dying chanticleers. Those who were most pugnacious took to football, and while none of us reached, the first year, the college team, we furnished some tough, elastic and unbreakable scrubs. In baseball we furnished the college pitcher, and in the Class contest we defeated the Sophomores, even though they had Shannonhouse in the box.

At the close of our first year, we found our mental stature mightily increased and with the exception of the few who collided with "below 60," we went home a

happy lot. Of course our greatest sorrow came from parting with the respected, honored, and awe-inspiring name of Freshman.

We were soon back at College, as sedate, as modest, as quiet, as unacquainted with unspeakable Freshmen as well-bred Sophomores always are. We of course called once or twice at the conventional hours, left our mourning cards, were a trifle bored by their crude attempts to entertain us by their uncalled for dancing and singing, and went our way wondering at the oddities of Freshmen. So greatly did the college authorities appreciate our magninimity to the Freshmen that they suggested to only one of our number that his father needed him at home, and really they could spare him.

We did other things well, too. We studied, we Saint Maryed, Peaced, B. U. W'd., we nelped in the Societies. That year A. and M. put out its first really strong football team. We were represented in it by Sadler, Sykes, Hardie, and Watkins. Sadler developed into a quarterback that startled U. N. C. and Clemson. In Class athletics we were defeated in football by the Juniors, but defeated them in baseball

The year was a busy one with us and we met many difficulties that we could not have overcome, had all not lived up to our motto: "Through difficulties to glory." Our history this year was quite satisfactory. We had five men to reach the coveted honor roll. Mr. J. B. Lynch was chief artist for the Agromeck. Owing to the stubborn law known as "the survival of the fittest," there were fewer of us at the end of the year than at its beginning. Some of our men worked their own way through this and other years.

At last came the ripe college year, the Junior, a year which a college man faces with ever-increasing seriousness. He has grown older. He feels the responsibilities of life quietly beginning to steal on him. He may be no leaner, but he thinks more. Some of our men dropped out this term; some had to work, some had gone the length of their tether, others were disabled by finances. However, one or two new men were added to temper our sense of loss.

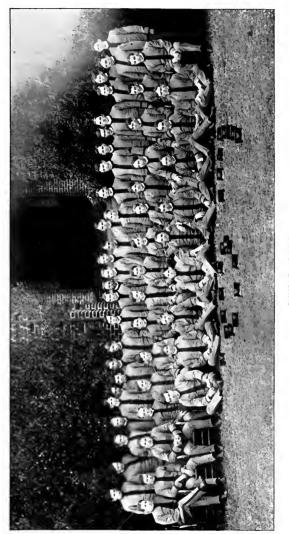

This is a year in which the Juniors are trying to make a high mark on the tree. We see how short is our time, and how vast is the volume of work to be done. Yet we want to do it, and are determined to let no opportunity of improvement go by.

Our record in our Class will be higher, we think; our mental resources will be taxed to carry fully our load, but our backs do not intend to break.

We have started well. In Class, in drill, in society, in athletics, our men are reaching high. Let us hope that in life we may reach higher.

Then here's a health to those who have left us, and a bumper to those who are answering the daily roll call. May no happiness be too great for 'o7.

Historian.

JUNIOR CLASS.

To the Class of '07

عن عن

Oh, where are the days that are past and gone, And whither the hours flown? For it seems so short since the setting sun, On our first eve at college, shone.

Can it possibly be that three whole years Have silently slipped away.
Or is it a dream, a deceiving dream,
That passes within a day?

No, never a dream, and yet how gay, How joyful does it seem, As I think of the many happy hours, As out of the past they gleam.

Another year will pass and then 'o7 will be no more; We must leave forever old A, and M, We go away from her door.

Then let us make sure, Oh Class-mates, dear, Of the friendship's bonds we've formed; Let's strengthen them day by day as we go And let them by nothing be harmed.

Sophomore History

Je 34

Last year I was lustorian of '08, and my class has again honored me with the office. I will do my best to put my past experience to profit and do justice to a subject, that in two years has grown so large.

It seems a very short time since we first walked with fear, and trembling, up the campus of old A, and M, amid the whistling and jeering of those who were feeling the first glories of being Sophs. They said we were the greenest ever, and perhaps we were. However, we did not stay so long, for before another sunrise most of us were brown or black. But we endured this with patience, knowing that our time would come next.

We organized our Class in November, and began to get up a team to enter the contest for the faculty cup. Although we didn't win the cup we gave the winners a hard run, the fact that we were Freshmen and didn't know what we really could do, being the only thing that saved the day for the Juniors. Time passed swiftly and soon we were up against the long-dreaded Xmas exams. But most of us passed these successfully and went home with light hearts and empty stomachs to get something to eat.

In the spring the baseball fever soon took hold of the college and I am very proud to say that our Class furnished a man for the Varsity that played an error-less game for A, and M. After the Varsity season Class teams were organized to decide the baseball championship of the college. By this time we knew how strong we really were and that we only had to play to win. It fell to our lot to play the Sophomores and we put them on the swine 6-2. We were overjoyed by our victory, and aided by the discomfited Juniors, we gave the score as much publicity as possible. This exhibition of so-called "freshness" led, a week later, to what is known in our history as the "Battle of Bloody Fourth," in which we were defeated by a clever piece of strategy.

Final examinations were soon upon us, and despite the many exclamations of "I have flunked again," most of us made enough to pass. Then came commencement and final dress parade, after which every one took himself to the depot, and promising to save up all his pennics for polish, left for home.

CHAPTER II.

Only three months and yet what a change! No longer lowly Freshmen, scorned and despised by upper classmen, who considered it beneath their dignity to associate with us, but Sophomores! It is a great thing to be a Sophomore, and using the Freshmen as a mirror, to see how green we really were. Before leaving in the spring we resolved to eclipse anything ever done here before. The Freshmen know the result. We gave them more in three weeks than we received in nine months.

We are very sorry that on account of this, our Class roll is not as large as it formerly was. This is due to the crank who died *bravely* and *quietly* in an attempt to make himself a hero. His social corpse now lies in state in old Main.

But to turn to brighter things. We have, in our studies overstepped the bounds set by our predecessors and are setting high standards for the next Sophs.

We have been very distinguished in athletics this year. One of our Class was a star on the football team, and another, one of the best pitchers the college ever had. In brief, the Class of 'o8 is the "only one," it is the best of all.

In conclusion a toast:

Here's to '08, Here's to white and blue, And here's to the seventy-five Of its members brave and true.

Freshman History

عن عن

As this is our first year in college, our record is very short and there is little to relate.

We, like all other Freshmen, have had our visits from the Sophs. On one occasion we baricaded the third floor of the "Bloody Fourth," as we expected the Sophs to come around on one of their blacking tours. They did not show up, however, but had they, a very warm reception would have been accorded them, for we were fully prepared.

In September we held our first Class meeting and elected as temporary President, Mr. Ralph Long. At another meeting, held sometime later, we elected the permanent officers. As Mr. Allen, our first Vice-President, did not return after Xmas, Mr. J. A. Porter was elected to fill the vacancy.

On the football squad we were well represented by Huckabee, Nooe, Williams, Whittington, Mumford, Stephens and Tompson. We also expect to have some good men on the baseball, tennis and track teams. We regret very much that the football game of the Class series, between the Junior and Fresh teams, could not be played, as we were sure that the victory would be ours.

It will only be a few more months of hard work before we start on our second vear of college life, and I am sure that as Sophs, we will do great things and keep our record as it has been as Fresh—clean.

In Memoriam

Whereas, God, in his infinite wisdom, has taken from among us to dwell with him, our class-mate and friend, James Edwin Moore, of Williamston, N. C., and

Whereas, we deeply grieve to lose so loyal a friend, so faithful a student, and so manly a man from our College and our State:

Therefore, be it resolved, that we, the members of the Senior Class of 1906, of the North Carolina College of Agriculture and Mechanic Arts, assembled this day to honor the memory of our departed class-mate, do extend our deepest sympathy to the bereaved family and other relatives of Mr. Moore, and

Resolved, further, that a copy of these resolutions be sent to Mr. Moore's mother, and that they be published in the Red and White and the Agromeck, of which the deceased was an editor, in the Wilmington Enterprise, the Raleigh News & Observer, and the Raleigh Times.

W. S. Tomlinson,

К. L. Вілск,

Committee.

MAIN BUILDING

THE BATTALION

The Battalion

ROM colonial times to the present, there has always been a large element of trained soldiers among the citizens of our country. These men received their training in the sternest of military schools-actual warfare. They have constituted the very backbone of our nation, the most conservative and patriotic body of men in body politic. They have passed on from one war to another, the military traditions which have served as an inspiration to generation after generation of young Americans. Now the soldiers of our last great war are rapidly passing away. If war were to come upon us again, as come it may at any time, these men would be too old to be of service. We would have to rely on the younger generation entirely to defend our land and enforce our national policies. With our Anglo-Saxon prejudice against standing armies, and our wise ideas of national economy, we maintain to-day, a regular force which would be the merest nucleus of the great army we might have to raise at any time. Hence we see the wisdom of the military training of young men from the point of view of the public interest alone, and we also see how every boy who is training himself in military science, even though his services may never be called for, is performing a patriotic duty.

Probably not one-tenth of the knowledge obtained from a college course is of any practical use to a graduate in after life, yet what wise man, for that reason, would condemn a system of college education. The studies pursued in college find their greatest benefit in the mental exercise and discipline they afford, and no subject affords this more than military drill. It emphasizes the importance of terse and accurate use of language. It develops in officers and non-commissioned officers, their power to control and command and affords an excellent form of physical exercise so necessary to students.

Nevertheless there are to be found people who oppose military education, who are opposed even to the work of our own battalion, but no one knows better, we hope, the value of our work, than the members of the battalion themselves.

The most important event in the history of the battalion this year was the visit of President Roosevelt on October 19th. From the opening of the school year this event had been looked forward to and served as a stimulus under which, in less than six weeks, the raw recruits were developed into fairly well drilled soldiers. The battalion together with about six companies of the National Guard served as the escort of the President from Raleigh to the Fair Grounds. The troops then passed in review before him, and the cadets were complimented on all sides for their neat appearance and soldierly bearing.

A few days before the President's visit a handsome flag staff was raised directly in front of the main building. On the occasion of the first raising of the flag, the battalion was drawn up in form of a hollow square, facing inward, and the stars and stripes were hoisted while the band played "The Star Spangled Banner," and every school day since that, the most beautiful of national standards has floated over our college, "Long may it wave," is the toast of every loyal cadet.

THE AGRICULTURAL BUILDING

Sunset

. .

As I gaze upon the richly crimson'd sky,

Pictures of the past, across this glowing sea,

Flitting swiftly on their journey, pass me by;

And, in passing, leave behind them, and to me,

Tracings of the joyous scenes of long ago.

Blended splendor, purple, golden; the sunset

Is, alas! a dying joy; an after-glow.

Day and night, in battle, face to face have met.

Happy day succumbs and sombre night prevails,

Sadd'ning hearts and chaining souls to stones of death.

Souls that raise to heaven, long and frightful wails,

That to silence die, when gone is mortal breath.

The Storm's Victory

عن عن

The ship is rocking to and fro;
The waves lift high their crests;
The winds in fury howl and blow,
As o'er the sea they hurr'ing go,
In wild and direful quests.

In furious battle, wind and waves,
Together clash and roar;
To subdue the one, the other craves,
While each in greater fury raves,
As they approach the shore.

Now bright and sharp the lightning's flash, And deep the thunder's roll. Against the ship the waters dash And try her noble sides to crash— To crush her, mast and pole.

Within is heard a mother's prayer,
A child in terror cries.
And every face shows sad despair.
There's only anguish pictured there;
There're only groans and sighs.

The ship has stood her battle well,
But now the storm succeeds;
Her sails are torn, and each huge swell
Sweeps o're her deck a dark, death knell;
Defeat she now concedes.

The baby's cries are heard no more
And hushed the mother's prayer;
The ship in splinters on the shore,
Will sail the cruel sea no more,
The storms to brave and dare.

COMMENCEMENT MARSHALS, 1905

A Parting

O'er the hills the sun is slowly sinking,

Down beneath the sombre, brown-clad hills it fades away to rest. Golden glories, fast, the earth is drinking;

Silent, solemn, night brings sadd'ning throl's to beat within one breast.

Youd the Vale, a life is slowly creeping,

Eyes once bright as heaven's blue now dimmer grow and smiles are few— Tender eyes will soon be deeply sleeping.

Soft and low, he bids farewell to sweetheart, loving, kind and true.

RURAL SCIENCE CLUB

The Rounders

عر عر

Being ye Rounder Club, the most exclusive organization in ye College. Many come but few are chosen, because those possessing the combination requisite for membership are a rather minus quantity. Some have attempted to sail under our flag, but failing to produce the goods have struck colors. So we stand alone, the unexcelled and isolated Rounders; the only ones in captivity of the College regulations.

Object: To do missionary work, to get next, and to study human nature.

So we: Count the day won whose bright

Ascending sun

Views in our minds some

Theory to be spun—about somebody or some condition in College.

Ambition: To get somebody down pat, and get along by studying how to keep from studying to get along—and incidentally to connect with a sheep-skin

Habits: Well—er—really you might criticize.

Pastime: We occasionally dabble in politics.

Password: "The Sign of The Fonr."

Requisites for admission: A good constitution, a fair amount of gameness, and a philosophical mind.

Favorite study: To determine the whyforeness of the where.

Favorite drink: Anything wet.

Au Revoir: May our memory be perpetuated.

OLD DOMINION CLUB

NEW ORGANIZATION.

A Biological-Agricultural Monor Society Organized at A. & M. College.

A society which will devote itself to advanced work along biological-agricultural lines has recently been organized among the upper class" men of the Agricultural College. Membership in the society stands for special ability and scholarship as well as exemplary character and good standing with student body. Students are chiesen wholly upon merit, and the number is limited to ten members from the Junior and Senior classes.

On January 16th, the Society met for organization at the hone of Dr. F. L. Stevens, who, through unwavering interest in the work of the agricultural students is responsible for this new movement. At this meeting the organization was partially completed and at an adjourned session at Principal and a session at Principal session in the principal session at Principal session

of government established. The charter members are:

From the Schot Class: J. C. Beavers, Morrisulle: M. H. Chesbro. Claremont, Va.; S. W. Foster. Vanco: H. S. McLendon, Ansonville.

Representing the Junior class are L. J. Herring, Clinton, L. F. Koonce, Richland; J. E. Overton, Alaskle; J. E. Turlington, Clinton.

Honorary members are J. C. Temple, instructor in the Bacteriological, Laboratory, and J. O. Morgan, Farm Superintendent; both alumni of the College.

Captain and Adjutant.

A. and M. COLLEGE,

West Raleigh, N. C., Dec. 11, 1905.

Offence: Absent B. R. C. and D. R. C., Dec. 9.

Explanation: The report is a mistake. Your Royal Majesty will probably remember jacking me up at breakfast roll call of Dec. 9.

Respectfully submitted,

J. T. EATON,

Cadet Privats, Junior Class.

Stunners

ی ی

Maxwell wore "cits" to the State Fair. Quite unexpectedly he came face to face with the Commandant and the following dialogue took place.

MAXWILL:—"Do you know where I can find my brother, Raymond Maxwell?

He is at the A. and M., in the Senior Class."

COMMANDANT:—"I am sorry, Mr. Maxwell, but the boys are scattered so that it would be hard to find him to-day, but if I see him I will tell him that you are looking for him."

MERCHANT:—"What can 1 do for you to-day, sir?"

HUBAND:—"I want to get a collar—number fourteen, the same style that I am wearing."

MERCHANT:-"I am very sorry, but we are just out of that number. Would any other size do?"

HUBAND:—"Give me two sevens."

e de de de de de

The Commandant has a habit (perhaps it is his duty) of removing beds and trunks from their accustomed places, to see if the floor is clean under them.

One bright Sunday morning he found that the trunks in one room would not move, whereupon he exclained: "There must be pig iron in those trunks."

If he had seen the three inch screws with which they were fastened to the floor, he would have said, "pig-steel."

Prof. Wilson (at textile building, talking over 'phone.):—"Mr. Hewlett, what is the matter over there? I can't get any current."

Hewlett (at electric power house):—"The belt has come off. Hang up your receiver, hell is to pay over here."

Twiddle-de-dect, see Knox eat— I'll tell you boys, he's hard to beat. When elected to his place, My! how long did get his face!

Poor boy! poor boy! Life for him has lost its joy. His appetite came in subjection. All on account of that election. Once upon a time there was a man named Ellis. This same Ellis did see a girl he liked exceedingly well. Later he persuaded one "Dutchy" to 'phone and obtain permission for him to call. Through the 'phone, "Dutchy's" voice sounded like unto the natural tones of Ellis so that the girl did not know that "Dutchy" 'phoned and Ellis called.

Sometime later this Dutchman 'phoned the girl, unknown to Ellis, and made an engagement for Ellis to take her to a ball game. Great was the chagrin of this Ellis when he found out his predicament.

* * * * *

The girl went to the matinee, The room was close, not breezy, But she took mint drops 'long with her, That breathing might be easy.

She dropped some mint drops on the stairs. The fellow stepped upon 'em. Tripped on the trail of her long skirts And caused—well, mercy on him!

The air grew close, she louder breathed. At last she sought the door, And exclaimed, "The next to accompany me, Will not be Lacy Moore."

* * * * * *

"BCSS" LATTIMORE (reading newspaper):—"A record was made for speed today by an auto, making 100 miles in sixty-two minutes. The next competer (competitor) coming out four miles behind."

the state of the state of

McBrayer:—" 'Buss,' I showed my ignorance to-day."

"Buss":-"How's that?"

McBrayer:—"Mrs. Louis wanted to take my temperature and 1 put the wrong end of the $\it{microscope}$ in my mouth."

BOB UZZELL (the hospital at 2 a. m., taking treatment):—"Cut off the water!"

.

"Mac" has express package in the office.

SHORTY:—" 'Mac," you'd better get that package, they sell them every Saturday."

"FOR FOUR LONG YEARS."

French Cleaning and Dyeing

In the hands of experts, cleaning and dyeing is an exact science—an accomplished fine art. Our work is giving perfect satisfaction to hundreds of patrons, which is conclusive proof that we are experts.

Dry Cleaning—Our improved French process revolutionizes the cleaning of ladies' gowns. It prevents shrinking and doesn't injure trimmings. No powerful chemicals used to rot the fairic. Men's clothes, military uniforms, regalia and coachman's livery renovated

Dyeing in all the fashionable colors. Goods won't become stiff and hard; nor will they e. We dye and curl feathers.

Rugs and Carpets Dyed in solid colors.

Blankets made soft and "fluffy." Our new way of cleaning raises the nap and increases their warmth. You can trust them with us.

Miscellane us-Infant's garments, kimonas, dressing sacques, etc., made to look like new. Gentlemen's fine suits thoroughly cleaned and pressed by our SPECIAL process at \$1.50-not simply sponged and half pressed

Our new booklet, just out, is yours for the asking.

Life Insurance Co.

What is your Dollar Worth

We are the First LEGAL. RESERVE Life Insurance Company Organized in North Carolina.

Its value depends upon its earn-

ing power or its purchasing pow-er. In Life Insurance the Dollar that earns the highest rate of interest will purchase the most protection

Interest Rates are Higher in the South and the cost of management very much less, therefore your dollar will buy more Insurance in a Home Company than in a Northern Company. Our people are fast finding this out. We issued and delivered

Over Four Hundred Thousand Dollars

of Insurance in North Carolina during the month of September, BUY YOUR INSURANCE IN YOUR HOME COMPANY,

On account of the higher interest rates and economy of management we can sell you the standard 15 payment participating life policy at the age of thirty for \$34.79 per \$1,000. The Northern Companies charge for the same policy 20 premiums, varying from >2 87 to \$34.76 per \$1,000. WHY PAY SO DEARLY FOR SHIPPING YOUR MONEY OUT OF THE STATE?

TRUSTEES GEO. A. GRIMSLEY,

J. W. SCOTT, P. H. HANES, Jr. W. S. THOMSON, W. A. BLAIR, J. P. TURNER, A. CRIMSU J. VAN LINDLEY, President. GEO. A. GRIMSLEY, Secretary.

LOOMS

LOOMS FOR PLAIN OR FANCY WEAVING

20-Harness Dobby Loom (4x1 Boxes) We build looms all widths up to 110 inches. These may be used as plain looms but are constructed to receive dobbies or Jacquard heads. We also build these looms with drop heads.

We have new designs with important patented improvements.

We own all the patterns of the "Bridesburg" looms, of the "Wood" looms and of the "Fairmount" looms, besides those of our own improved designs.

We make repairs for all these and also make special patterns and repairs for all looms. We build other cotton mill machinery, cotton oil mill machinery, deep house machinery, electric work, steam heating, power plants, and general repairs, and do machine designing and mill engineering.
